

WHAT IS GEOCACHING?

Geocaching is a global treasure hunt in which participants use Global Positioning System (GPS) receivers to find geocaches hidden throughout the world. Caches can be as small as a dime or as large as a military ammo can. Some caches are not even physical caches, but events or significant landmarks.

HOW TO PLAY:

You will need a smart phone and a free account at Geocaching.com. As you locate cache boxes, look for a laminated card. Some boxes contain letters that form part of the secret word. Four boxes contain coordinates for the final box, which contains the form to be completed with the secret word for a commemorative Whittemore geotrail token!

Community. Culture. Conservation.

the geotrail

The Whittemore Geotrail project is a partnership between the Friends of Whittemore and The Northern New Jersey Catchers, who have assisted with the development of this geotrail. We also thank Geocaching.com for their support of this project.
